Summary

Data Scientist and AI Engineer with hands-on experience building and deploying end-to-end ML systems. Specialized in predictive modeling, NLP, and MLOps practices including pipeline automation, experiment tracking, and containerized deployment. Proven ability to deliver production-ready solutions across healthcare, e-commerce, and business forecasting domains.

Education

Delta Technology University Sep 2021 - Jun 2026
Bachelor's, Software Engineering

Experience

Genius Technology Center - Machine Learning Intern Sep 2025 - Oct 2025

- Built California House Price ($R^2=0.846$, $MAE=29K$) and Diabetes Prediction Systems (94% accuracy, 85% recall).
- Developed a Hybrid Recommendation System as the final project.
- Completed an intensive ML internship covering preprocessing, EDA, and deep learning basics.

Digital Egypt Pioneers Initiative - Data Scientist Intern Nov 2024 - May 2025

- Trained by IBM & AMIT in Python, SQL, ML algorithms, model evaluation, and deployment.
- Developed multiple projects, including a complete Sales Forecasting System as the final project.

Projects

Email Spam Classification Pipeline - [Link](#) - [Live Demo](#)

- Built an end-to-end MLOps pipeline (ingestion → preprocessing → training → evaluation → deployment) achieving 97% accuracy, 98 % AUC, and 91% F1-score on 5500 record.
- Used Git, DVC, and YAML for version control, experiment tracking, and configuration management.
- Deployed a FastAPI app containerized with Docker on Hugging Face Spaces; implemented structured logging and exception handling.

GitHub Issue Classifier - [Link](#)

- Built an automated NLP pipeline using Fine-tuned DistilBERT (GitHub API for ingestion) and a Custom Weighted Trainer to effectively handle class imbalance.
- Engineered a modular MLOps workflow from preprocessing to evaluation, achieving a 74% F1-score on real-world software engineering datasets.
- Deployed a containerized FastAPI web app via Docker, featuring a real-time inference interface with confidence scores and probability distributions.

Hybrid Recommendation System - [Link](#)

- Combined collaborative & content-based filtering (TF-IDF + Nearest Neighbors); improved personalization (RMSE = 0.93, MAE = 0.81); deployed via Streamlit.

Sales Forecasting - [Link](#)

- Predicted units sold using Prophet, Random Forest, XGBoost, and Linear Regression; achieved best performance with XGBoost ($MAE = 7.19$, $R^2 = 0.992$); deployed using FastAPI and tracked experiments with MLflow.

Skills

Programming: C++, Java, Python, SQL
AI, Machine Learning Libraries: Scikit-Learn, TensorFlow, PyTorch, Hugging Face
Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Excel
Databases: SQLite, MySQL, MongoDB
Deployment & MLOps: DVC, DVCLive, MLflow, Docker, FastAPI, Streamlit, Git, GitHub
Soft Skills: Analytical Thinking, Problem Solving, Data Storytelling, Creativity, Team Collaboration, Time Management

Certificates

Fine -tuning Language Models -Hugging Face	May 2026
Machine Learning Specialization – Coursera	Oct 2025
Digital Egypt Pioneers Program – Data Scientist	May 2025
SQL - DataCamp	Jan 2025
Mathematics Certificate - 365 Data Science	Nov 2024
Data Science & Machine Learning - Black Horse	Oct 2024
